## SUPERVISORY AND MANAGERIAL TRAINING

The transition from a team member to a team leader or supervisor is the most significant change a person will make during his or her career. Unfortunately, very little of a person's earlier work experiences prepare him or her for the transition. It is important that a supervisor possess the skills which will enable him or her to lead others as well as to manage his/her own work load effectively.

The Naval Air Warfare Center Aircraft Division recognizes that learning is a lifelong process, and that supervisors, both new and experienced, have special training and developmental needs. To that end, we strive to provide a program of on-site courses which will meet the needs of these individuals. The courses which we have designed are based on the competencies which have been established by the Navy in the Civilian Leadership Continuum. These competencies, documented within this text, reflect key supervisory tasks performed by all supervisors, regardless of their place in the organization.

### **NEW SUPERVISORS**

Each new supervisor, in conjunction with his or her first level supervisor, must prepare an Individual Development Plan based on personal and organizational needs within forty-five (45) calendar days of appointment to the supervisory position. The IDP should reflect the competencies stated in the civilian leadership continuum. The courses which a new supervisor can choose from to ensure that they possess the proper background in supervisory skills include:

Introduction to Personnel Management for Supervisors\*<sup>1</sup>
Supervisory Skills I: Introduction to Supervision\*
Supervisory Skills II: How to Motivate Others\*
Introduction to Project Management
Team Skills and Concepts (TQL course)
Leadership Communication: Confidence & Competence
Leading Organizational Change
Advance Project Management
Shaping the Mentor experience as a Mentor
The Science of Leadership and the Art of Gaining Followers (TQL course)
The Seven Habits of Highly Effective People

<sup>\*</sup> Mandatory for all new supervisors during probationary period.

#### PROGRAM CERTIFICATION

New supervisors should strive to complete a total of 100 hours of supervisory training within the first eighteen months of appointment. Those individuals who meet this goal will receive a certificate of achievement in supervision.

### **EXPERIENCED SUPERVISORS**

Experienced supervisors and managers should ensure that they continue their development. The old method of a "boss" and "subordinate" is no longer valid in a competency aligned organization. Today's supervisor requires a new set of skills including, coaching, leading, and mentoring. Leadership becomes critically important during transition periods. Any of the courses which were mentioned above would enhance the skills of a seasoned supervisor.

### PRE-SUPERVISORY DEVELOPMENT

Many professionals desire to move into management positions. In order to assist their development, we are offering Dynamic Leadership. This workshop provides the opportunity for employees to prepare for the transition to leadership by assessing their capabilities and interests in supervision. Individuals who do not occupy positions which are designated as supervisory are welcome to sign up for all other classes as space permits.

For many formal and informal leaders, the techniques and issues surrounding these activities are difficult to identify and control. This workshop answers questions of how, when and where to perform these skills. Practical steps provide tools for effectively performing in each of these situations while maintaining a focus upon both the needs of the employee and the work responsibilities. Workshop exercises provide opportunity for participants to practice the tools and skills relative to their particular work circumstances and issues.

DESCRIPTION:	This one day workshop is a follow-up and skills refresher workshop for people who have completed Supervision I and II. The workshop is limited to 20 participants to facilitate discussion and individual skills renewal.  The focus of the program is upon influencing performances of others through applying the communications and problem solving practices covered in Supervisory Skills I and II. Participants will be encouraged to share success and problem experiences. A "case study" approach will be employed using instructor and participant generated situations. Participants will receive a text to be read and a questionnaire to be completed prior to the workshop. The "text" will be selected for its relevance to leadership in general and to management practices of the NAVAIR Team environment. The questionnaire will include a self-assessment of leadership strengths and improvement needs. Its design and intent is to encourage self appraisal and identification of development needs. The questionnaire is not returned to the instructor but is referred to in the class session. Topics addressed:  EXOverview/Review of Fundamental Skills of Communicating, Managing, Leading and Problem Solving  EXAnalysis and Problem Solving Using Instructor Generated Case Studies  EXDealing with "Problem Performers": Superior, Peer and Subordinate  EXImproving the Quality of People and Process Performance  EXImproving the Quality of People and Process Performance  EXIMPROVING Performance, Commitment and Enthusiasm  EXIMPROVING Performances and Performers Analysis and Problem
